

Beyontec Portals

Beyontec Portals leverages web-based technology to enable your customers to handle their own transactions. This process ensures higher customer satisfaction and reduces turnaround time for each transaction.

Your customers feel empowered by your transparency and your information sharing, all within the comfort of their homes.

Portals increase your employees' productivity and gives them more time to monitor portfolios and ensure that portfolios are balanced and in line with business expectations.

The Broker Portal

helps your brokers generate quotes, issue policies, request endorsements, access policies and claims, get customer details, and process other transactions

The Customer Portal lets your customers access policy-related information, renew policies, request

new quotations, get endorsements, initiate claims, and pay premiums.

The Reinsurer Portal lets your facultative partners access risk information, get real-time acceptance, and receive the periodic reports required for treaty participants

The Surveyor Portal informs your surveyors as soon as claims are allocated for inspection. They can access all relevant risk information and upload survey reports through this portal.

The Garage Portal lets vehicle owners inform their garages once their vehicle repairs are allocated. They can provide access to their garages to enter the cost of spare parts and service — and to submit their invoices.

The Employee Portal lets HR partners develop employees into knowledge managers. They can manage agents, as well as monitoring and controlling transactions irrespective of their locations.
