

## Beyontec Reinsurance

Beyontec Reinsurance offers comprehensive risk evaluation and management functions through its reinsurance portal.

It gives you the flexibility to gather data and create reports based on your requirements.

It also allows you to send emails to various stakeholders, track task status, and enable integrated document management to store all risk-related documents.

### With this module, you can:

- Automatically allocate policy premium to treaties with an option to change
- Access real-time allocations to Treaty Participants
- Sort/list/search risk accumulation by specific data
- Allocate XOL treaty for claims automatically
- Create/add coinsurance leader and follower policies
- Create/add facultative inward and outward policies
- Send automatic e-mails to treaty participants for claims above defined limits
- Option to include mid-term FAC participants and create out-of-sequence endorsements
