# Know your risk exposure before you underwrite

Visualize and map your risk-exposure using Beyontec Risk Accumulation Accelerator and take more informed underwriting decisions. The simple plug-in can be quickly integrated with any core insurance solution.

Assessing the risk exposure accurately is important for every insurer who want to maximize his underwriting performance. Beyontec Risk Accumulation Accelerator will enable underwriters to accurately review and analyze individual and accumulated risks - building, street, area, city or country-wise - before taking business decisions on quotations or introducing new insurance products. This tool helps to accurately assess the risk potential, and assists in estimating the appropriate premium for a given risk, based on a variety of pre-defined parameters. The tool will also help insurers better negotiate treaty terms with re-insurers.

Apart from this, the accelerator will also enable the insurer to upload new risk data and integrate it with the existing policy administration system.

## WIN-WIN FEATURES

**The Risk Accumulation Accelerator enables you to:**

- Define, review and analyze risk accumulation, as per your data visualization preferences
- Leverage online maps to track portfolio level risk-accumulations and measure proximity to other risk exposures
- Integrate risk exposure with your quoting and policy administration systems by defining limits
- Classify risks by type, validate risk exposures during claims filing and flag risks that exceed thresholds
- Compare existing and prospective risks, and assess

## WHAT YOU GET

- Accurate analysis of risk exposure for better underwriting
- Visual representation of risk portfolio with online map coordinates
- Helps with sales planning for new business and in estimating appropriate premiums based on risk exposure
- Better underwriting credibility with rich data
- Better negotiation with re-insurers
- Analysis of sum assured distribution by location

incremental effects of new risks

- Obtain geo-coding for property risk aggregation
- Gather precise information for gross exposures, retention capacities and reinsurance cession

Beyontec Risk Accumulator Accelerator is a must-have for any underwriter looking to define, review and analyze risk accumulation by different types and location. Developed by Beyontec Solutions, a global insurance solution provider, the Risk Accumulation Accelerator is a fully-integrated, pre-configured, real-time solution that automatically identifies and tracks portfolio-level risk accumulations. It gives precise

information for gross exposures, retention capacities, reinsurance cession and hidden risks, thus helping insurers make better underwriting decisions.

The main advantage with Beyontec's suite of accelerators, including the Risk Accumulation Accelerator, is that, it is compatible with any existing core insurance solution.

## WHY ACCELERATORS?

Beyontec accelerators are tailor-made solutions that fulfill specific IT and business needs not addressed by existing insurance systems. They can be easily integrated in to any existing system, to enhance the core functionality and efficiency. They optimize the use of new age technologies and help insurers significantly save on total IT spends while improving overall time-to-market, performance and giving them a distinct advantage over competition.
