Get EVG compliant the efficient way

Compliance with the EVG deadline can no longer be a concern if you start using Beyontec EVG Accelerator bot. The simple plug-in can be quickly integrated with any core insurance solution.

As mandated by the insurance authorities, all insurance companies need to issue policies only through the EVG (Emirate Vehicle Gate) portal.
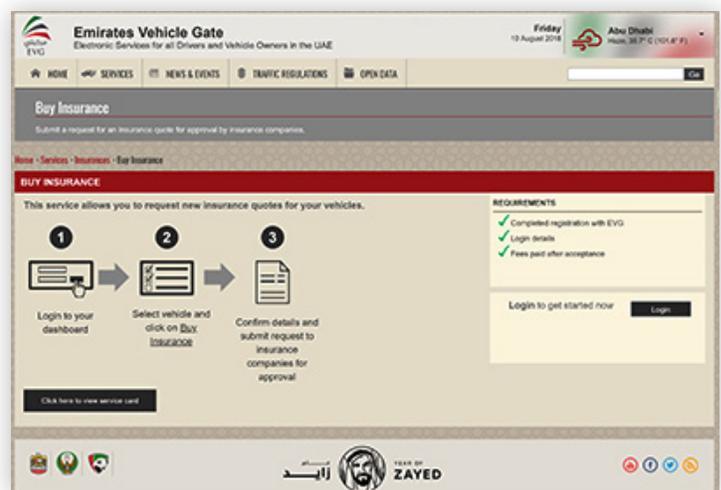

For regional insurance companies that are not yet ready for the change, Beyontec offers an EVG Accelerator in the form of a bot that seamlessly integrates with their existing policy systems and enables them to automatically execute new policies and renew existing policies via a mandated EVG portal, without making any changes to the existing processes and system.

The bot retrieves policy information from the existing insurance management system and automatically updates the EVG portal, filling in the corresponding data across about 50 mandatory fields. The bot also back-updates the EVG reference details to your core system automatically, error-free.

WIN-WIN FEATURES

Beyontec's pre-configured, ready-to-deploy EVG Accelerator bot enables you to:

- Automate and streamline your EVG compliance, while reducing cycle times
- Eliminates the scope of human error
- Ensures complete compliance with the changing EVG regulations
- Automatically updates the EVG portal with policy information, while making sure every mandatory field is filled in

WHAT YOU GET

- Complete compliance with EVG regulations
- Absolute control over issue and renewal of policies
- Fully automated, quick-to-deploy solution to manage policy issuing process
- Scalable and reliable solution that offers hundred percent accuracy of data
- Eliminates manual intervention
- No changes to existing systems and processes

- Back-updates your core system with EVG reference details
- Keeps track of your transaction processes and gets notified, when a transaction is a success or failure

- Scales up bots using the Bots Controller depending on policy volumes

Beyontec EVG Accelerator bot is a must-have for any insurance provider looking to quickly comply with the EVG regulation, without having to custom-build new applications or modify existing systems and processes. Developed by Beyontec Solutions, a global insurance solution provider, it's a fully-integrated, pre-configured, real-time solution that offers a set of automated tasks designed to address the compliance needs mandated by the EVG portal, eliminating manual entries and associated challenges.

The main advantage with Beyontec's suite of accelerators, including the EVG Accelerator bot, is that, it is compatible with any existing core insurance system. It can be integrated with any exiting system that you may be using in less than four weeks.

WHY ACCELERATORS?

Beyontec accelerators are tailor-made solutions that fulfill specific IT and business needs not addressed by existing insurance systems. They can be easily integrated in to any existing system, to enhance the core functionality and efficiency. They optimize the use of new age technologies and help insurers significantly save on total IT spends while improving overall time-to-market, performance and giving them a distinct advantage over competition.
