

Expand Your Business Activities Online with Portal Solutions

Beyontec Accelerator Portals are self-service enablers that help insurers expand their business activities on the web - providing access to the right information to the right user constituents, while empowering users to access information and transact in real-time.

Digital innovation is forcing business to migrate to an online ecosystem, by driving interconnections between different constituents. This makes it easy and quick to collaborate and conduct business on a single platform. Beyontec's Accelerator Portals help extend your business on the web, interconnecting your customers, brokers, surveyors, garages and all other business partners together. They offer unprecedented access to information and services which help in improved customer retention.

Furthermore, these accelerator portals give control to the users to monitor and manage their tasks, irrespective of where they might be.

BEYONTEC ACCELERATOR PORTALS

The Broker Portal

This portal enables your brokers to generate real-time quotes, issue policies, request endorsements, access policies and claims, get customer details, process transactions, and generate customized dashboards and reports. The customer360, a mini CRM tool, provides instant access to customer profiles, helping your brokers handle queries more effectively.

WHAT YOU GET

- Extend your business activities using dedicated online portals
- Users can now complete their respective tasks in real-time
- Profile-based access to information for accurate decision making
- Better customer experience and improved productivity, at one go
- Instant communication features like chat, notes & diaries, and comments to handle queries on the fly
- Open new channels to cross sell and upsell with existing customers

The Customer Portal

The portal empowers your customers to access policy documents, generate quotations, pay premiums, retrieve endorsements, report claims and renew policies. Apart from making them self-reliant, this portal helps them save time and makes it more convenient for them to carry out their tasks efficiently, from the comfort of their home.

The Surveyor Portal

This portal benefits surveyors as it notifies them about allocation of claims for inspection and lets them access all relevant risk information and upload their survey reports and images. It improves their efficiency, minimizes inaccuracies and omissions and saves them time, by enabling them to gather details upfront and complete the survey findings accurately.

Beyontec Accelerator Portals are a must-have for any insurance provider looking to automate and extend their business on the web. Developed by Beyontec Solutions, a global insurance solution provider, it is a fully-integrated, pre-configured, web-based solution that offers a set of profile-based portals designed for giving users the accountability and freedom to manage their tasks efficiently and increase productivity.

The Garage Portal

The online portal provides real-time access to the networked garages providing them with information on repair specific tenders issued by the insurer. This enables garages to instantly quote and accept work orders from the insurer cutting down the manual processes, paperwork and time. By automating tasks related to the garage, the portal provides real-time information on repair status to the policy holder, facilitates submission of invoices for the work order received and generates statement of accounts for the garage. The garage portal improves the overall efficiency of the vehicle repair processes and minimizes fraud.

The advantage with Beyontec's suite of accelerators, including the Accelerator Portals, is that, they are compatible with any existing core insurance system.

WHY ACCELERATORS?

Beyontec accelerators are tailor-made solutions that fulfill specific IT and business needs not addressed by existing insurance systems. They can be easily integrated in to any existing system, to enhance the core functionality and efficiency. They optimize the use of new age technologies and help insurers significantly save on total IT spends while improving overall time-to-market, performance and giving them a distinct advantage over competition.
